

MARCH WINNER

# 75 Red Buckets of Surprises!

“ Interesting story, to say the least... The project was for the DOE and is currently still ongoing. I was the Coatings Engineer for the project and had multiple site/chemical resistance requirements that the coatings needed to meet. John Maloney, Rick Brown, Jim Rippi, Dwayne Meyer, and Carboline Testing Lab answered the call and were able to test the products needed to the specific requirements to be used on site. Only company out of multiple that were asked to provide tested data and trial runs before the coatings could be applied. I'm forever grateful to the guys at Carboline for their tireless effort to make this project a success. ”

Michael J. Pardo

S&B Engineers and Constructors

No photos of onsite project as those are not allowed but these are some offsite photos from another project.
