

APRIL WINNER

75 Red Buckets of Surprises!

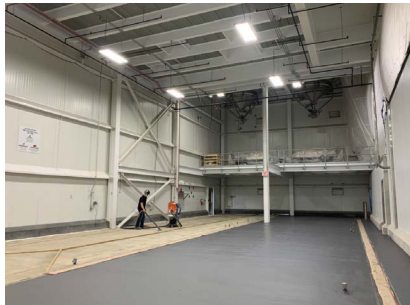

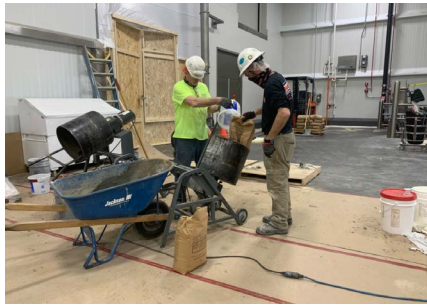

“ Last year, I was contacted by one of our food and beverage customers with a project that required a lot of work to happen quickly before new equipment was to be installed.

The project required sloping about 5,000 Square Feet and installing Carbocrete SR and Carbocrete FC with 2 foot tall troweled curbs using Carbocrete Cove.

I reached out to Jason knowing getting the material to the site quickly would be a challenge, especially with the raw material shortages we had been facing in the industry. Jason and his customer service team was able to pull materials from multiple warehouses and deliver them on time for our project start! ”
