

SEPT WINNER

75 Red Buckets of Surprises!

“ My name is Joe Bishop, and I work for HCI Industrial and Marine Coatings. We've used Carboline products on several water towers. I prefer Carboline products because they are user friendly, and Craig Figgins is always there to help if a problem exists. HCI sprayed Carboline plural component products in several water towers and the work better than all the competitors plural products. If I had my way, we would use Carboline on every jobsite. ”
