

High Performance Coatings Seminar

May 3-5, 2010

*Carboline Company announces its **High Performance Coatings Seminar** to be held in St. Louis on May 3-5, 2010. Carboline seminars enjoy a rich tradition as educational seminars which offer to enhance our customer's knowledge on the principles of corrosion control through protective coatings. Whether you are a corrosion engineer, an architect, an applicator, an owner, or a fabricator, there is always something new to learn especially when it comes from your peers and other attendees. Our open forum format will encourage and allow those conversations to take place. It is our hope that you will leave more informed about high performance coatings and their uses. You will have the opportunity to meet with key Carboline personnel in Technical Service and Sales/Marketing support areas, and perhaps initiate lifelong contacts and relationships with others in our industry at this seminar.*

The 2-day agenda is outlined on the following pages and briefly describes the subjects and content of the seminar topics. We hope you will find them useful and interesting.

We look forward to you being our guest at this seminar. We know that you are all very busy and your time is important. It is our sincere hope that you will enjoy your time here and that it measures up to your expectations. We will do everything we can to meet them.

There is no charge for the seminar and it includes meals for both days. Transportation and hotel accommodations are not included.

Location:

HOTEL - Sheraton WestPort Lakeside Chalet
Carboline World Headquarters
St. Louis, MO

High Performance Coatings Seminar *May 3-5, 2010*

May 3

(6:00 PM - 8:00 PM)

- **Opening Reception**

May 4

(8:00 AM - 5:00 PM)

- **Corrosion Principles**
 - *Why do we paint?*
- **Coating Composition**
 - *What makes up a gallon of paint?*
- **Generic Types**
 - *What's the difference between an epoxy polyamide, an epoxy phenalkamine, and a hybrid polysiloxane?*
- **Surface Preparation**
 - *The foundation for a good performing system*
- **True Cost of Coatings**
 - *Matching products to needs and understanding cost over life expectations*
- **Weathering Finishes**
 - *Why do some products weather better than others?*
- **Testing Methods/Advances**
 - *What do the tests really tell us?*
- **Coating Recommendations**
 - *How do you choose the right system?*

May 5

(8:00 AM - 3:00 PM)

- **New Construction Systems**
 - *Specifying systems for optimum performance*
- **Surface Tolerant Coatings / Overcoating**
 - *Add service life with a limited budget*
- **Maintenance Painting Programs**
 - *Plant audits, painting priorities, and budgets*
- **Tank Linings**
 - *Systems for extreme service*
- **Chemical-Proofing Concrete**
 - *Learn how to properly protect concrete against aggressive exposures*
- **Coatings Inspection**
 - *What to look for and why it is important*
- **Common Coating Problems/Failure Analysis**
 - *Learn from other's mistakes!*
- **Special Coating Needs**
 - *Unique problems call for unique solutions*

Application for 2010 Corrosion School
May 3-5, 2010

Applicant

Name: _____

Company Name: _____

Address: _____

Tel: (____) _____

Fax: (____) _____

Email: _____

Hotel Accommodations: \$ 129.00 (plus tax per night)
