

History. Service. *Innovation.*

Water tanks, wastewater facilities, manholes, and pipelines are constantly exposed to aggressive corrosive environments. Our **Reactamine® 760 HB** is an innovative product that is designed to be applied at a high thickness (up to 350 mils) in one coat, eliminating the need for an additional surface coating. This zero VOC, 100% solids lining is environmentally friendly, protects concrete and steel against corrosion and may be returned to service in as little as 4 hours. It is excellent for repairing pitted steel, sealing pitted tanks, and protecting irregular surfaces.
